

KURAM - Research Center for the Conservation of Cultural Property of Foundations

The Research Center for the Conservation of Cultural Heritage of Foundations (KURAM) implements various technical research and practice applications for traditional building materials that will be investigated or used in the conservation of cultural heritage buildings.

RESEARCH

KURAM supports research activities within the scope of undergraduate, graduate, doctoral and post-doctoral level research projects developed in the field of conservation of movable and immovable cultural properties. The Research Center includes "Prof. Dr. Ahmet Refik Ersen Restoration and Conservation Laboratory" and aims to carry out research projects especially with a certain type of historic structure analysis and of traditional building materials, periods, history of construction and construction systems.

TRAINING

KURAM contributes to the training of students in various levels of education at Fatih Sultan Mehmet Vakıf University in both theoretical proficiency and practical experience in areas of conservation. KURAM Laboratories and Workshops within the research center are used in the courses offered in associate, bachelor's, master's and doctoral programs. Practical courses and seminar programs on application practices encountered often in conservation of movable cultural property are organized in the conservation workshop.
